ANALYZING PIZZA SALES DATA

SQL PROJECT SHOWCASE

Introduction

Objective:

The main goal is to analyze extensive pizza order data to uncover trends, assess performance across different pizza categories, and derive insights that can help in strategic decision making and marketing efforting

Data Sources:

Our analysis is based on four key tables:

A). Order Details: Contains specifics of each order including order ID, Pizza ID, and quantity.

B). Orders: Records the date and time of each order.

C). Pizzas: Details about each pizza including size and price.

D). Pizza Types: Information about pizza categories, names, and ingredients.
